Good afternoon Stuart, thank you for the call and the updates on Friday. I will expect the Intertek Inform invoice for the platform this week.

Tomorrow, I will provide you with landing page text that will advise the user on copyright and what a harmonized standard is. It is approx. 220 words and was supplied by CEN CENELEC.

I will also provide T&C text. [REDACTED]
As is in place, user will need to tick the box on registration acknowledging the T&Cs.

These 2 texts are currently being reviewed. There may be a need to update in the coming weeks, but will need to be in place for Wed.

We require the site to be live on Wednesday 15th May, so that it can be reviewed by CEN CENELEC.

Can you confirm that the [REDACTED] will be replaced with [REDACTED]

Can Librios set this up or if there is any technical assistance required, please let Gavin and me know.

The launch date has not been confirmed and may be a little later than the 17th May.

To confirm, now we are just being asked to have the 4 hENs available on the portal.

Let me know anything that I may have missed actioning.
Regards,
Eoin
