Indian Standard

CLASSIFICATION OF COSMETICS RAW MATERIALS AND ADJUNCTS

PART 2 LIST OF RAW MATERIALS GENERALLY NOT RECOGNIZED AS SAFE FOR USE IN COSMETICS

(Third Revision)
FOREWORD

This Indian Standard (Part 2) (Third Revision) was adopted by the Bureau of Indian Standards, after the draft finalized by the Cosmetics Sectional Committee had been approved by the Petroleum, Coal and Related Products Division Council.

This standard was first published in 1973 and revised to publish it in two parts. Other part is:

Part 1 Dyes, colours and pigments

Through use of the both standards particularly (Part 2), the Committee felt that preparation of such a list is an effective step in guarding against harmful substances being used in formulation of cosmetics. This standard was essentially based on EEC Directive 76/768 with marginal differences in certain parameters in line with restrictions given in Drugs and Cosmetic Act, and Rules 1945 (such as permissible limits of fluoride in dentifrice and m-, p-phenylene diamines for use in hair dyes). Substances, which were provisionally allowed by EEC Directive were not included in this standard.

In the second revision the list was updated to include new materials which either should not form part of cosmetics or to be used with restrictions. This updation was done again based on EEC Directives 2001.

The present revision has also been taken up to align and update the standard with the provisions of EEC Directive 76/768/EEC-2007 currently in vogue.

There is no ISO Standard published by the International Organization for Standardization on the subject title at present.
**Indian Standard**

**CLASSIFICATION OF COSMETICS RAW MATERIALS AND ADJUNCTS**

**PART 2 LIST OF RAW MATERIALS GENERALLY NOT RECOGNIZED AS SAFE FOR USE IN COSMETICS**

(Third Revision)

1 **SCOPE**

This standard (Part 2) lists cosmetics raw materials and adjuncts, other than dyes, colours and pigments in the following four groups:

- a) List of substances classified as ‘GNRAS’ which must not form part of the composition of cosmetic products (see Annex A),
- b) List of substances which cosmetic products must not contain except subject to the restrictions and conditions laid down (see Annex B),
- c) List of preservatives allowed (see Annex C), and
- d) List of U.V. filters allowed in sunscreen products (see Annex D).

2 **TERMINOLOGY**

For the purpose of this standard, the following definitions shall apply:

2.1 ‘GRAS’ List — Ingredients which are generally recognized as safe and which when used in concentration conventionally adopted shall be permissible in cosmetics.

2.2 ‘GNRAS’ List — Ingredients which are generally not recognized as safe and which shall not be permissible either in any amount whatsoever or in amounts exceeding those specifically laid down for cosmetics.

2.3 Preservatives — Substances which may be added to cosmetic products for the primary purpose of inhibiting the development of micro-organisms in such products.

2.4 U.V. Filters — U.V. filters are substances used in cosmetic sunscreen products, which are specifically intended to filter certain U.V. rays in order to protect the skin from certain harmful effects of these rays.

NOTE — Any ingredient classified as ‘GNRAS’ (see Annex A) may be present as an impurity when its concentration is less than what can be detected by standard analytical method. It shall not, however, be used as a component of a preparation.

3 **GNRAS LISTS FOR INGREDIENTS OTHER THAN DYES PIGMENTS AND COLOURS**

All the ingredients prescribed in this standard have been classified as per the following four lists:

- a) Annex A — List of substances which must not form part of the composition of cosmetic products.
- b) Annex B — List of substances which cosmetic products must not contain except subject to the restrictions and conditions laid down.
- c) Annex C — List of preservatives which cosmetic products may contain.
- d) Annex D — List of U.V. filters which cosmetic sunscreen products may contain.

ANNEX C
(Clauses 1 and 3)
LIST OF PRESERVATIVES WHICH COSMETIC PRODUCTS MAY CONTAIN

PREAMBLE

1. Preservatives are substances which may be added to cosmetic products for the primary purpose of inhibiting the development of micro-organisms in such products.

2. The substances marked with the symbol (*) may also be added to cosmetic products in concentration other than those laid down in this Annex for other specific purposes apparent from the presentation of the products, for example, as deodorants in soaps or as anti-dandruff agents in shampoos.

3. Other substances used in the formulation of cosmetic products may also have anti-microbial properties and thus help in the preservation of the products, as, for instance, many essential oils and some alcohols. These substances are not included in this Annex.

4. For the purposes of this list:
   a) ‘Salts’ is taken to mean: salts of the cations sodium, potassium, calcium, magnesium, ammonium and ethanolamines; salts of the anions chloride, bromide, sulphate, acetate.
   b) ‘Esters’ is taken to mean: esters of methyl, ethyl, propyl, isopropyl, butyl, isobutyl, phenyl.

5. All finished products containing formaldehyde or substances in this Annex and which release formaldehyde must be labelled with the warning ‘contains formaldehyde’ where the concentration of formaldehyde in the finished product exceeds 0.05 percent.

LIST OF PERMITTED UV FILTERS WHICH COSMETIC PRODUCTS MAY CONTAIN

For the purpose of this Directive, UV Filters are substances, which contained in cosmetic sunscreen products, are specifically intended to filter certain UV rays in order to protect the skin from certain harmful effects of these rays.

These UV filters may be added to other cosmetic products within the limits and under the condition laid down in this Annex.

Other UV filters used in cosmetic products solely for the purpose of protecting the product against UV rays are not included in the list.
