NATIONAL FOREWORD

This Indian Standard which is identical with ISO 3636 : 1977 “Size designation of clothes — Men’s and boys’ outerwear garments” issued by the International Organization for Standardization (ISO) was adopted by Bureau of Indian Standards on the recommendation of the Apparels (Ready-Made Garments) Sectional Committee and approval of the Textile Division Council.

This standard supersedes IS 10015 (Part 2) : 1989 ‘Size designation of clothes: Part 2 Men’s and boys’ outerwear garments (*first revision*)’ to align Indian Standard with the corresponding International Standard.

The text of ISO Standard has been approved as suitable for publication as Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.

In this adopted standard, the following International Standard is referred to. Read in its place the following:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 3635 : 1981 Size designation of clothes — Definitions and body measurement procedure	IS 14453 : 1997/ISO 3635 : 1981 Size designation of clothes — Definitions and body measurement procedure	Identical

Technical Corrigendum 1 to the above International Standard has been printed at the end.

Indian Standard

SIZE DESIGNATION OF CLOTHES — MEN'S AND BOYS' OUTERWEAR GARMENTS

0 INTRODUCTION

This International Standard is one of a series which deals essentially with the size designation of clothing, and is not directly concerned with sizing systems as such.

The primary aim of this and other International Standards in this series is the establishment of a size designation system that indicates (in a simple, direct and meaningful manner) the body size of the man or boy that a garment is intended to fit. Provided that the shape of his body (as indicated by the appropriate dimensions) has been accurately determined, this system will facilitate the choice of garments that fit.

The size designation system is based on body and not garment measurements. Choice of garment measurements is normally left to the designer and the manufacturer, who are concerned with style, cut and other fashion elements, and who must make due allowance for garments normally worn beneath a specific outer garment.

Definitions and body measurement procedure are prescribed in ISO 3635, which is applicable to all categories of clothing.

1 SCOPE AND FIELD OF APPLICATION

This International Standard establishes a system of designating the sizes of men's and boy's outerwear garments

(including knitwear and swimwear) that are classified as

- a) covering the upper or the whole body, or
- b) covering the lower body only,

and applies to civilian and uniform garments.¹⁾

Both the control dimensions on which the size designation system is based and the method of indicating the size designation on a garment label are laid down.

2 REFERENCE

This International Standard should be read in conjunction with the following International Standard :

ISO 3635, *Size designation of clothes — Definitions and body measurement procedure.*

3 DEFINITIONS

For the purposes of this International Standard, the definitions given in ISO 3635 and the following definitions apply :

3.1 man : A male person whose growth in height is finished.

3.2 boy : A male person whose growth in height is not yet finished.

1) Examples of garments covered by this International Standard are given in the annex.

4 CONTROL DIMENSIONS

The control dimensions shall be as follows :

- a) Men's garments covering the upper or the whole body :

Other than knitwear	Knitwear
1) Chest girth	Chest girth
2) Waist girth	
3) Height	

- b) Men's garments covering the lower body only :

Other than swimwear	Swimwear
1) Waist girth	Waist girth
2) Hip girth	
3) Inside leg length	

- c) Boy's garments covering the upper or the whole body :

Other than knitwear	Knitwear
1) Height	Chest girth
2) Hip girth	
3) Chest girth	

- d) Boy's garments covering the lower body only :

Other than swimwear	Swimwear
1) Height	Waist girth
2) Hip girth	
3) Waist girth	

5 SIZE DESIGNATION

5.1 The size designation of each garment shall comprise the control dimensions (see clause 4), in centimetres, of the intended wearer of that garment. Where practicable, the standard pictogram, as given in ISO 3635, should be used as a means of indicating the size designation. Where it is not practicable to use the standard pictogram the numerical values of the control dimensions shall be given, together with the descriptive words such as chest girth, waist girth,

etc., alongside, in the order in which they are given in clause 4.

NOTE — The above requirements shall not preclude the use, in exceptional instances and as specified by the national standards organization concerned, of

- a) size designations comprising only one or two of the applicable control dimensions;
- b) size designations shown as a range by stating the minimum and maximum control measurements separated by an oblique stroke or a hyphen.

5.2 Garment measurements shall not be incorporated in the size designation but, where considered of value, garment measurements may be indicated separately (see 6.3).

6 LABELLING

6.1 Method

The size designation of each garment shall be indicated clearly, conspicuously and in plainly legible form on a label, or on a swing ticket, or on both. Pictograms shall be large enough to ensure immediate understanding and numerals shall, in all cases, be readily discernible.

6.2 Attachment

The label or swing ticket shall be securely attached to the garment and so positioned as to be easily readable.

6.3 Additional information

Information additional to the size designation may be separately indicated on the label, or on the swing ticket, or on both, provided that it does not in any way reduce the prominence and conspicuousness of the size designation. Such additional information may include a size code number, body measurements, or garment measurements considered to constitute useful information.

6.4 Examples of labels

The examples of labels given in figures 1 and 2 illustrate methods of labelling that range from the simple indication on the standard pictogram of the relevant control dimensions to more elaborate forms that provide additional information, such as a garment measurement or a size code number. Where the size designation is supplemented by a size code number, separation of the two, as illustrated, renders the size code number readily recognizable as being part of a system of size designation adopted by a national or limited population group only.

Bureau of Indian Standards

BIS is a statutory institution established under the *Bureau of Indian Standards Act*, 1986 to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

Copyright

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Director (Publications), BIS.

Review of Indian Standards

Amendments are issued to standards as the need arises on the basis of comments. Standards are also reviewed periodically; a standard along with amendments is reaffirmed when such review indicates that no changes are needed; if the review indicates that changes are needed, it is taken up for revision. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition by referring to the latest issue of 'BIS Catalogue' and 'Standards: Monthly Additions'.

This Indian Standard has been developed from Doc : No. TX 19 (0306).
