STANDARDS & INDUSTRIAL RESEARCH INSTITUTE OF MALAYSIA

© Copyright
This Malaysian Standard, which had been approved by the Food and Agricultural Industry Standards Committee and endorsed by the Council of the Standards and Industrial Research Institute of Malaysia (SIRIM) was published under the authority of the SIRIM Council in August, 1981.

SIRIM wishes to draw attention to the fact that this Malaysian Standard does not purport to include all the necessary provisions of a contract.

The Malaysian Standards are subject to periodical review to keep abreast of progress in the industries concerned. Suggestions for improvements will be recorded and in due course brought to the notice of the Committees charged with the revision of the standards to which they refer.

The following references relate to the work on this standard:

Committee representation

The Food and Agricultural Industry Standards Committee under whose supervision this Malaysian Standard was prepared, comprises representatives from the following Government Ministries, trade, commerce and manufacturer associations and scientific and professional bodies:

Federal Agricultural Marketing Authority
Federation of Malaysian Consumers Association
Federation of Malaysian Manufacturers
Malaysian Agricultural Research and Development Institute
Ministry of Agriculture (Agriculture Department)
National Chambers of Commerce and Industry of Malaysia
Oil Palm Growers’ Council of Malaysia
Rubber Producers’ Council of Malaysia
Rubber Research Institute of Malaysia
University Pertaniam Malaysia

The Technical Committee on Animal Feeds which prepared this Malaysian Standard consists of representatives from the following member organizations:

Federation of Malaysian Manufacturers
Malaysian Edible Oil Manufacturer’s Association
Malaysian Feedmillers’ Association
Malaysian Scientific Association
Ministry of Agriculture (Agricultural Products Utilization Unit)
Ministry of Agriculture (Division of Agriculture)
Ministry of Agriculture (Division of Veterinary Services)
Ministry of Agriculture (MARDI)
Ministry of Science, Technology, and the Environment (Chemistry Department)
Ministry of Trade and Industry (MIDA)
National Chambers of Commerce and Industry of Malaysia
Pig Farmers’ Association
Poultry Farmers’ Association
United Planters Association of Malaysia
University Pertanian Malaysia

Acknowledgment

SIRIM acknowledges with thanks and profound appreciation the invaluable support and contribution by the following active members:

Prof. A.R. Omar (Chairman)    University Pertanian Malaysia
Dr. C. Devendra (Deputy Chairman)    Malaysian Agricultural Research and Development Institute
Puan Emily Leong                  Division of Veterinary Services
Puan Monaiza Mohd                   Division of Agriculture
Enoch K.K. Woo                          Gold Coin Limited
Enoch Ng Ewek Yeo                     SOCOIL
Enoch Ghani Senik      Agricultural Products Utilization Unit
FOREWORD

This revised Malaysian Standard was prepared by the Technical Committee on Animal Feeds and Feedstuffs under the authority of the Food and Agricultural Industry Standards Committee.

It is intended chiefly to cover the technical provisions relating to coconut cake as an animal feedstuff. It does not include all the necessary provisions of a contract.

It is based on IS : 2154-1962, 'Specification for coconut oilcake as livestock feed' and IS : 3591-1968, 'Specification for solvent-extracted coconut oilcake meal as livestock feed'.

This Malaysian Standard is intended to replace the existing Malaysian Standard MS 3.1, 'Specification for coconut oilcake'.

SPECIFICATION FOR COCONUT CAKE

1. SCOPE

1.1 This Malaysian Standard prescribes the technical requirements for coconut cake used as animal feedstuffs and in animal feeds. It covers coconut cake produced by a hydraulic process, by an expeller process, or by solvent extraction.

2. DEFINITION

2.1 Coconut cake shall be the residue left after the partial or complete removal of oil from copra.

3. SAMPLING

3.1 General instruction for sampling. In drawing, preparing, storing and handling samples, the following precautions, and directions shall be observed and the general rules for making a representative sample shall be considered.

3.1.1 Samples shall be taken in a protected place not exposed to damp air, dust or soot.

3.1.2 The sampling device shall be clean and dry when used.

3.1.3 Precautions shall be taken to protect the samples, the material being sampled, the sampling device and the containers for samples from adventitious contamination.

3.1.4 The samples shall be placed in clean and dry containers. The latter shall be of such a size that they are almost completely filled by the sample.

3.1.5 Each container shall be sealed airtight after filling and marked with full details of sampling, date of sampling, name of sampler, batch or code number, name of the manufacturer and other particulars of the consignment.

3.1.6 All the samples shall be analysed as soon as possible. If necessary, they shall be stored in such a manner that there is no deterioration of the material.

3.1.7 Sampling shall be done by an authorised officer of the testing agency in the presence of the purchaser (or his representative) and the vendor (or his representative).

3.2 Scale of sampling

3.2.1 All the bags in a single consignment of the material drawn from a single batch of manufacture and containing the same amount of material shall constitute a lot. If a consignment is declared to consist of different batches of manufacture, the batches shall be grouped separately and the bags in each group shall constitute a separate lot.

3.2.2 Samples shall be tested for each lot for ascertaining conformity of the material to the requirements of the standard.

3.2.3 The number of bags to be selected from the lot shall depend on the size of the lot and shall be at least one half the square root of \( N \) where \( N \) is the number of bags in the lot. Provided that a minimum of 3 bags shall be selected. In case of doubt, the number of bags to be selected shall be increased to 10% of the bags in the lot.
3.2.4 The bags shall be chosen at random from the lot and for this purpose a random number table shall be used. If such a table is not available, the following procedure shall be adopted:

Arrange all the bags in the lot in a systematic manner and starting from any bag count serially and withdraw the rth bag where

\[ r = \frac{N}{n} \]

N being the number of bags in the lot and n the number of bags to be chosen according to 3.2.3. If r comes out to be a fractional number, its value shall be taken as equal to its integral part.

3.2.5 When the lot size is less than 10, one composite sample prepared by taking equal quantities of the materials from different parts of each bag in the lot shall be tested.

3.3 Preparation of sample

3.3.1 Equal quantities of the material representative of each bag, selected according to 3.2.3, shall be drawn, using an appropriate sampling device if necessary, and mixed up together so as to form a composite sample weighing not less than 0.76 kg. This composite sample shall be divided into three equal parts and transferred to clean and dry containers and labelled with the particulars given under 3.1.5 and sealed airtight. One of these samples shall be for the purchaser, another for the vendor, and the third for the referee.

4. REQUIREMENTS

4.1 Description. The material shall be totally free from harmful constituents, including aflatoxin.

4.2 The material shall conform to the requirements prescribed in table 1.

5. TESTS

5.1 Tests shall be carried out on the composite sample in the manner prescribed by the relevant clauses of MS 3.2.

6. CONFORMITY

6.1 A lot shall be considered as conforming to the specification when the test results on the composite sample satisfy the requirements specified for all the properties.

7. PACKING AND MARKING

7.1 Packing. Unless otherwise agreed by the purchaser and the vendor, the material shall be packed in new clean and sound jute bags or other suitable containers. The mouth of each bag shall be machine-stitched or rolled over and hand-stitched.

7.2 Marking. Each bag shall be suitably marked to give the following information:

(a) name and type of the material;

(b) name of the manufacturer;

(c) batch or code number;

(d) net weight in kilogrammes;

(e) date of packing.

7.3 Each bag may, by arrangement with the Standards and Industrial Research Institute of Malaysia, also be marked with the SIRIM Certification Mark.

TANDA-TANDA STANDARD SIRIM

Keterangan-keterangan lanjut mengenai syarat-syarat lesen boleh didapati dari:

Ketua Pengarah,
Institut Standard dan Penyelidikan Perindustrian Malaysia,
Persiaran Dato' Menteri, Seksyen 2, Peti Surat 7035,
40911 Shah Alam,
Selangor.

SIRIM STANDARD MARKS

The SIRIM Standard Marks shown above are registered certification trade marks. They may be used only by those licensed under the certification marking scheme operated by SIRIM and in conjunction with the relevant Malaysian Standard number. The presence of these Marks on or in relation to a product is an assurance that the goods have been produced under a system of supervision, control and testing, operated during production, and including periodical inspection of the producer's works in accordance with the certification marking scheme of SIRIM designed to ensure compliance with a Malaysian Standard.

Further particulars of the terms of licence may be obtained from:

Director-General,
Standards and Industrial Research Institute of Malaysia,
Persiaran Dato' Menteri, Section 2, P.O. Box 7035,
40911 Shah Alam,
Selangor.

INSTITUT STANDARD DAN PENYELIKIKAN PERINDUSTRIAN MALAYSIA

Standard-Standard Malaysia disediakan hanya setelah penyiasatan yang lengkap menunjukkan bahawa sesuatu projek itu disahkan sebagai yang dikesukaranda dan berpadanan dengan usaha yang terlibat. Hasil ini berasaskan persetujuan sukarela, dan memberi pertimbangan kepada kepentingan pengeluar dan pengguna. Standard-Standard Malaysia adalah sukarela kecuali ia dimastikan oleh badan-badan berkuasa melalui peraturan-peraturan, undang-undang persekutuan, atau cara-cara lain yang sesuai.

Institut ini beroperasi semata-mata berasaskan tanpa keuntungan. Ia adalah satu badan yang menerima bantuan kewangan daripada Kerajaan, kumpulan wang dari bayaran keahlian, hasil dari jualan Standard-Standard dan terbitan lain, bayaran-bayaran ujian dan bayaran-bayar sesuatu projek itu disahkan sebagai yang dikehendaki dan berpadanan dengan usaha yang terlibat. Hasil ini berasaskan persetujuan sukarela, dan memberi pertimbangan kepada kepentingan pengeluar dan pengguna.

The Standards and Industrial Research Institute of Malaysia (SIRIM) is established with the merger of the Standards Institution of Malaysia (SIM) and the National Institute for Scientific and Industrial Research (NSIR) under the Laws of Malaysia Act 157 on 16th September, 1975: Standards and Industrial Research Institute of Malaysia (Incorporation) Act 1975. The Institute is vested with the power to provide for the promotion and undertaking of industrial research and for the preparation and promotion of standards for commodities, processes, practices and services; and to provide for matters incidental to or connected with those purposes.

One of the functions of the Institute is to prepare Malaysian Standards in the form of specifications for materials and products, methods of testing, codes of sound and safe practice, nomenclature, etc. Malaysian Standards are prepared by representative committees which co-ordinate manufacturing capacity and production efficiency with the user’s reasonable needs. They seek to achieve fitness for purpose, simplified production and distribution, replacement interchangeability, and adequate variety of choice without wasteful diversity.

Malaysian Standards are prepared only after a full enquiry has shown that the project is endorsed as a desirable one and worth the effort involved. The work is based on voluntary agreement, and recognition of the community of interest of producer and consumer. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by statutory authorities by means of regulations, federal and local by-laws or any other similar ways.

The Institute operates entirely on a non-profit basis. It is a grant aided body receiving financial aid from the Government, funds from membership subscriptions and proceeds from sales of Standards and other publications, testing fees and licence fees for the use of SIRIM Certification Mark and other activities associated with Standardization, Industrial Research and Consultancy Services.
