Subject: public comment on federal register re

committee on administration comments:

there should be zero use of "incorporation by reference". the state of nj does this too./ the people have absolutely zero access to this ancillary information, which means the people are disemboweled from participating in govT completely with this kind of incorporation. if it is worth having, it should be completely written into the law, which should be on the internet for all to see and abide by

[comments for other committees omitted]
