ASTM E185: Standard Practice for Conducting Surveillance Tests for Light-Water Cooled Nuclear Power Reactor Vessels

by [American Society for Testing and Materials](#)

Publication date	1982-01-01
Usage	CC0 1.0 Universal  
Topics	federalregister.gov , public.resourc e.org
Collection	publicsafetycode ; USGovernment Documents ; additional_collections
Language	English

This document was posted by Public.Resource.Org, which is not affiliated with nor authorized by the United States government, the State governments, or the American Society for Testing and Materials (ASTM). We posted this document in order to allow citizens to read the laws that govern us.

Note that many of these documents had to be procured on the used marketplace. Many of the laws in this collection were re-keyed into HTML and diagrams redrawn for increased usability and accessibility. Please note that the process of scanning, OCR, and rekeying might introduce errors. In addition, standards bodies will frequently issue errata or reissue standards over time and governmental bodies may change which standards they incorporate to law.

You are urged to check with the standards organizations or governmental authorities for further information and access to definitive versions of these important laws.

BY ORDER OF THE EXECUTIVE DIRECTOR
Office of the Federal Register
Washington, D.C.

By Authority of the Code of Federal Regulations: 10 CFR 50 App. H, I

Name of Legally Binding Document: ASTM E185: Standard Practice for Conducting Surveillance Tests for Light-Water Cooled Nuclear Power Reactor Vessels
Name of Standards Organization: American Society for Testing and Materials

LEGALLY BINDING DOCUMENT

This document has been duly INCORPORATED BY REFERENCE into Federal Regulations and shall be considered legally binding upon all citizens and residents of the United States of America.

HEED THIS NOTICE! Criminal penalties may apply for noncompliance.

ASTM E776: Standard Test Method for Forms of Chlorine in Refuse-Derived Fuel

by [American Society for Testing and Materials](#)

Publication date	1987-01-01
Usage	CC0 1.0 Universal  
Topics	federalregister.gov , public.resourc e.org
Collection	publicsafetycode ; USGovernment Documents ; additional_collections
Language	English

This document was posted by Public.Resource.Org, which is not affiliated with nor authorized by the United States government, the State governments, or the American Society for Testing and Materials (ASTM). We posted this document in order to allow citizens to read the laws that govern us.

Note that many of these documents had to be procured on the used marketplace. Many of the laws in this collection were re-keyed into HTML and diagrams redrawn for increased usability and accessibility. Please note that the process of scanning, OCR, and rekeying might introduce errors. In addition, standards bodies will frequently issue errata or reissue standards over time and governmental bodies may change which standards they incorporate to law.

You are urged to check with the standards organizations or governmental authorities for further information and access to definitive versions of these important laws.

BY ORDER OF THE EXECUTIVE DIRECTOR
Office of the Federal Register
Washington, D.C.

By Authority of the Code of Federal Regulations: 40 CFR 63, Subpart DDDDD, Table 6

Name of Legally Binding Document: ASTM E776: Standard Test Method for Forms of Chlorine in Refuse-Derived Fuel
Name of Standards Organization: American Society for Testing and Materials

LEGALLY BINDING DOCUMENT

This document has been duly INCORPORATED BY REFERENCE into Federal Regulations and shall be considered legally binding upon all citizens and residents of the United States of America.

HEED THIS NOTICE! Criminal penalties may apply for noncompliance.

ASTM F1003: Standard Specification for Searchlights on Motor Lifeboats

by [American Society for Testing and Materials](#)

Publication date	1986-01-01
Usage	CC0 1.0 Universal  
Topics	federalregister.gov , public.resourc e.org
Collection	publicsafetycode ; USGovernment Documents ; additional_collections
Language	English

This document was posted by Public.Resource.Org, which is not affiliated with nor authorized by the United States government, the State governments, or the American Society for Testing and Materials (ASTM). We posted this document in order to allow citizens to read the laws that govern us.

Note that many of these documents had to be procured on the used marketplace. Many of the laws in this collection were re-keyed into HTML and diagrams redrawn for increased usability and accessibility. Please note that the process of scanning, OCR, and rekeying might introduce errors. In addition, standards bodies will frequently issue errata or reissue standards over time and governmental bodies may change which standards they incorporate to law.

You are urged to check with the standards organizations or governmental authorities for further information and access to definitive versions of these important laws.

BY ORDER OF THE EXECUTIVE DIRECTOR
Office of the Federal Register
Washington, D.C.

By Authority of the Code of Federal Regulations: 46 CFR 199.175(a)(28)(i)

Name of Legally Binding Document: ASTM F1003: Standard Specification for Searchlights on Motor Lifeboats
Name of Standards Organization: American Society for Testing and Materials

LEGALLY BINDING DOCUMENT

This document has been duly INCORPORATED BY REFERENCE into Federal Regulations and shall be considered legally binding upon all citizens and residents of the United States of America.

HEED THIS NOTICE! Criminal penalties may apply for noncompliance.

Publication date	2006-01-01
Usage	CC0 1.0 Universal  
Topics	public.resource.org
Collection	publicsafetycode ; USGovernment Documents ; additional_collections
Language	English

This document was posted by Public.Resource.Org, which is not affiliated with nor authorized by the United States government, the State governments, or the American Society for Testing and Materials (ASTM). We posted this document in order to allow citizens to read the laws that govern us.

Note that many of these documents had to be procured on the used marketplace. Many of the laws in this collection were re-keyed into HTML and diagrams redrawn for increased usability and accessibility. Please note that the process of scanning, OCR, and rekeying might introduce errors. In addition, standards bodies will frequently issue errata or reissue standards over time and governmental bodies may change which standards they incorporate to law.

You are urged to check with the standards organizations or governmental authorities for further information and access to definitive versions of these important laws.

LEGALLY BINDING DOCUMENT **United States of America**

All citizens and residents are hereby advised that this is a legally binding document duly incorporated by reference and that failure to comply with such requirements as hereby detailed within may subject you to criminal or civil penalties under the law. Ignorance of the law shall not excuse noncompliance and it is the responsibility of the citizens to inform themselves as to the laws that are enacted in the United States of America and in the states and cities contained therein.

ASTM G151: Standard Practice for Exposing Nonmetallic Materials in Accelerated Test Devices that Use Laboratory Light Sources

by [American Society for Testing and Materials](#)

Publication date	1997-01-01
Usage	CC0 1.0 Universal 
Topics	federalregister.gov , public.resourc e.org
Collection	publicsafetycode ; USGovernment Documents ; additional_collections
Language	English

This document was posted by Public.Resource.Org, which is not affiliated with nor authorized by the United States government, the State governments, or the American Society for Testing and Materials (ASTM). We posted this document in order to allow citizens to read the laws that govern us.

Note that many of these documents had to be procured on the used marketplace. Many of the laws in this collection were re-keyed into HTML and diagrams redrawn for increased usability and accessibility. Please note that the process of scanning, OCR, and rekeying might introduce errors. In addition, standards bodies will frequently issue errata or reissue standards over time and governmental bodies may change which standards they incorporate to law.

You are urged to check with the standards organizations or governmental authorities for further information and access to definitive versions of these important laws.
