Preface

This document is Part 3 of thirteen parts of the official triennial compilation and publication of the adoptions, amendments and repeal of administrative regulations to California Code of Regulations, Title 24, also referred to as the California Building Standards Code. This Part is known as the California Electrical Code and incorporates, by adoption, the 2017 edition of the National Electrical Code of the National Fire Protection Association with the California amendments.

The California Building Standards Code is published in its entirety every three years by order of the California legislature, with supplements published in intervening years. The California legislature delegated authority to various State agencies, boards, commissions and departments to create building regulations to implement the State's statutes. These building regulations or standards have the same force of law, and take effect 180 days after their publication unless otherwise stipulated. The California Building Standards Code applies to occupancies in the State of California as promulgated.

A city, county, or city and county may establish more restrictive building standards reasonably necessary because of local climatic, geological or topographical conditions. Findings of the local condition(s) and the adopted local building standard(s) must be filed with the California Building Standards Commission to become effective and may not be effective sooner than the date filed with the California Building Standards Commission and in no case sooner than the effective date of this edition of California Building Standards Code. Local building standards that were adopted and applicable to previous editions of the California Building Standards Code do not apply to this edition without appropriate adoption and the required filing.

To familiarize yourself with the format of this code, it is suggested that users review the following contents:

- How To Distinguish Model Code Language From California Amendments
- Matrix Adoption Tables, located at the beginning of each chapter.

Should you find publication (e.g., typographical) errors or inconsistencies in this code, or wish to offer comments toward improving its format, please address your comments to:

The 2019 California Electrical Code (Code) was developed through the outstanding collaborative efforts of the Department of Housing and Community Development, Division of State Architect, Office of the State Fire Marshal, Office of Statewide Health Planning and Development, California Energy Commission, California Department of Public Health, California State Lands Commission, Board of State and Community Corrections, and the California Building Standards Commission (Commission).

This collaborative effort included the assistance of the Commission’s Code Advisory Committees and many other volunteers who worked tirelessly to assist the Commission in the production of this Code.

Governor Edmund G. Brown Jr.
Members of the Building Standards Commission

Secretary Marybel Batjer — Chair
Steven Wintel — Vice-Chair

Raj Patel
Elise Khushkudian
Larry Broun
Juvilyn Alegre

Erick Mikiten
Kori Suzuki
Peter Santilli

Mia Marselli — Executive Director
Michael L. Neuman — Deputy Executive Director

For questions on California state agency amendments please refer to the contact list on the following page.
How to Distinguish Between Model Code Language and California Amendments

To distinguish between model code language and the incorporated California amendments, including exclusive California standards, California amendments will appear in italics.

Symbols in the margins indicate the status of code changes as follows:

[SF] This symbol identifies which State agency(s), by its "acronym", has amended a section of the model code. For a complete listing of the State agency acronyms, see the Application Section within Chapter I.

C This symbol indicates a California amendment has been made to the model code.

This symbol indicates that a change has been made to a California amendment.

> This symbol indicates deletion of California language.

NOTATIONS USED IN THE NATIONAL ELECTRICAL CODE

The following notation appears in the National Electrical Code to aid the user:

Changes other than editorial are indicated with gray shading within sections. An entire figure caption with gray shading indicates a change to an existing figure. New sections, tables, and figures are indicated by a bold, italic "N" in a gray box to the left of the new material. An "N" next to an Article title indicates that the entire Article is new. Where one or more complete paragraphs have been deleted, the deletion is indicated by a bullet (•) between the paragraphs that remain.
