Larry A. Schemmel
Special Assistant Attorney General
Office of the Attorney General
State of Mississippi
Post Office Box 1850
Jackson, Mississippi 39215-1850

Dear Mr. Schemmel:

I am in receipt of your letter of October 7 regarding your request that we "immediately remove the annotated version of the Mississippi Code of 1972 Annotated from any and all ... website(s) and from all sites and all types of written and electronic media." We respectfully decline to comply with this request for the reasons stated herein.

First, let me thank you for thoughtful letter. I especially appreciate your support for the 8 Principles of Open Government Data, which I helped draft with 30 of my colleagues in 2007. If I may take the liberty of paraphrasing your letter, it seems like you are making two main points:

- You state that the State of Mississippi makes the unannotated version of the Code available and that this is complete, current, and official. (Emphasis in the original letter.)
- You state that the annotated version of the Code is also an "official version of the law of the State and includes the law itself and copyright-protected material." (Emphasis in the original letter.)

Let me begin by addressing the question of availability of the unannotated version of the Code via your vendor's web site. As you know, the 8 Principles of Government Data require that access to government data—particularly public domain data such as we both agree includes the unannotated Code—should be license-free and machine processable.

As you will see in Exhibit A, access to the site is initially blocked by a popup which requires the user to agree the Terms and Conditions. Those Terms and Conditions, which are attached in Exhibit B, consists of an extensive license agreement spanning 5 pages of exceedingly technical language in fine print.

Some of the highlights of the agreement include fairly draconian prohibitions against effective use, including a prohibitions against the ability to "copy, modify, reproduce, republish, distribute, display, or transmit for commercial, non-profit or public purposes all or any portion of this Web Site."

The terms of use, in turn, refer to the Copyright Statement from your vendor, which states:

No part of the materials including graphics or logos, available in this Web site may be copied, photocopied, reproduced, translated or reduced to any electronic medium or machine-readable form, in whole or in part, without specific permission (to request permission to use materials, continue to our Permission Request Form). Distribution for commercial purposes is prohibited.

If the user has the courage to click through, they are presented with a navigational interface based on frames and an extensive amount of clicking by the user before they can reach the section they are looking for (See Exhibit C). Finally, the user is presented with a section of the Code, for example Exhibit D, shows § 1-1-8.

The user interface your vendor presents is full of links to various proprietary products, but there is a little print icon, which presents a semi-clean version of the text, as shown in Exhibit E. However, there is a huge flaw in the user interface, in that the URL that is presented does not allow a user to share what they are looking at with other users. If you mail the URL to a friend, you don't get the section of the Code, you get a screen from your vendor hawking proprietary products as shown in Exhibit F.

The lack of permanent URLs and a modern user interface are just the beginning of problems with this web site.

- As you can see from Exhibit G, the site is replete with HTML errors, errors which prevent the text from properly working on modern standards-based browsers (I have included only the first 10 pages of the 39 page error report).
- In addition, as shown in Exhibit H, the site is replete with CSS errors, as shown in Exhibit H, making the site work improperly in browsers (again, I have included only the first 10 pages of the 165 error report, which is a test of only one of several of the CSS files used).
- In addition, as shown in Exhibit I, the site does not meet the Section 508 accessibility requirements of the U.S. Rehabilitation Act, which makes information available to people with disabilities.
- Finally, as shown in Exhibit J, your vendor does not permit search engines to crawl their site, making the most common discovery method for users unavailable in the case of the Mississippi Code. People should be able to easily discover what the law is.

Perhaps the biggest issue is that the public access that is provided does not allow bulk access to the data. This means that other sites, which might provide better formatting or accessibility, are prohibited from providing this service by the terms of use. There is no requirement that the State or your vendor provide a good web site, but prohibiting others from doing so is a significant barrier to the rule of law and our rights to read, know, and speak the laws which we must all obey.

Let me turn briefly now to the issue of the Annotated Official Code. Exhibit K contains the marketing literature provided by your vendor. As you can see, any citizen and

certainly any lawyer would feel totally remiss in not using the the official annotated version of the Code. The marketing literature stresses that:

Be sure that the law you read is the law indeed

Official isn't just a word. It's a process. The Mississippi Joint Legislative Committee on Compilation, Revision and Publication of Legislation maintains careful editorial control over the publication of the official code, from the moment LexisNexis receives the acts to the final galley proofs of the finished product. Their strict supervision ensures that the published code and its supplements contain no errors in content, conform carefully to the numbering scheme, and publish in a timely manner.

Cite the code that's guaranteed to be right

Because it's official, you can rely on LexisNexis' Mississippi Code of 1972 Annotated for the correct statement of the law ...

As you can see, it is very clear that the Code is the official statement of the law as promulgated by the State. This is not some independent commercial endeavor, this is an official process under the direction of the State.

I have attached as Exhibit L the same section earlier attached from Exhibit D, this one being the annotated version. As you can see by comparing the two, the Annotated Code includes important cross references, research references, and Editor's Notes. The Editor's notes are not simply creative work, they are important materials. For example, the note to § 1-1-11 is a reference to a statement adopted by the Joint Legislative Committee on Compilation, Revision and Publication of Legislation. Statements such as these are part and parcel of the law, statements of the codifiers that add important information to the original statutes.

I appreciate the efforts you have taken to reach out to me and the informative nature of your letter. It is clear you have given the matter careful consideration. However, we believe that the Official Code as promulgated by the Joint Legislative Committee and bearing the official authorship of the Committee falls squarely in the category of the law, which all citizens have the right to read, know and speak.

We therefore respectfully decline to remove the materials. However, I would be more than happy to discuss the matter including traveling to Mississippi to discuss the technical points which I have raised with you and others.

Sincerely yours,

Revalidate

Notes and Potential Issues

The following notes and warnings highlight missing or conflicting information which caused the validator to perform some guesswork prior to validation, or other things affecting the output below. If the guess or fallback is incorrect, it could make validation results entirely incoherent. It is *highly recommended* to check these potential issues, and, if necessary, fix them and re-validate the document.

Unable to Determine Parse Mode!

The validator can process documents either as XML (for document types such as XHTML, SVG, etc.) or SGML (for HTML 4.01 and prior versions). For this document, the information available was not sufficient to determine the parsing mode unambiguously, because:

- in *Direct Input* mode, no MIME Media Type is served to the validator
- No known Document Type could be detected
- No XML declaration (e.g `<?xml version="1.0"?>`) could be found at the beginning of the document.
- No XML namespace (e.g `<html xmlns="http://www.w3.org/1999/xhtml" xml:lang="en">`) could be found at the root of the document.

As a default, the validator is falling back to SGML mode.

No DOCTYPE found! Checking with default HTML 4.01 Transitional Document Type.

No DOCTYPE Declaration could be found or recognized in this document. This generally means that the document is not declaring its Document Type at the top. It can also mean that the DOCTYPE declaration contains a spelling error, or that it is not using the correct syntax.

The document was checked using a default "fallback" Document Type Definition that closely resembles "HTML 4.01 Transitional".

Learn [how to add a doctype to your document](#) from our [FAQ](#).

No Character encoding declared at document level

No character encoding information was found within the document, either in an HTML `meta` element or an XML declaration. It is often recommended to declare the character encoding in the document itself, especially if there is a chance that the document will be read from or saved to disk, CD, etc.

See [this tutorial on character encoding](#) for techniques and explanations.

Using Direct Input mode: UTF-8 character encoding assumed

Unlike the "by URI" and "by File Upload" modes, the "Direct Input" mode of the validator provides validated content in the form of characters pasted or typed in the validator's form field. This will automatically make the data UTF-8, and therefore the validator does not need to determine the character encoding of your document, and will ignore any charset information specified.

If you notice a discrepancy in detected character encoding between the "Direct Input" mode and other validator modes, this is likely to be the reason. It is neither a bug in the validator, nor in your document.

TOP

Validation Output: 83 Errors

Line 2, Column 1: no document type declaration; implying "<!DOCTYPE HTML SYSTEM>"

```
<html>
```

The checked page did not contain a document type ("DOCTYPE") declaration. The Validator has tried to validate with a fallback DTD, but this is quite likely to be incorrect and will generate a large number of incorrect error messages. It is highly recommended that you insert the

proper DOCTYPE declaration in your document -- instructions for doing this are given above -- and it is necessary to have this declaration before the page can be declared to be valid.

! Line 4, Column 91: NET-enabling start-tag requires SHORTTAG YES

```
...iewport" content="width=device-width, initial-scale=1.0, maximum-scale=1.0;" />
```

For the current document, the validator interprets strings like `<FOO />` according to legacy rules that break the expectations of most authors and thus cause confusing warnings and error messages from the validator. This interpretation is triggered by HTML 4 documents or other SGML-based HTML documents. To avoid the messages, simply remove the `"` character in such contexts. NB: If you expect `<FOO />` to be interpreted as an XML-compatible "self-closing" tag, then you need to use XHTML or HTML5.

This warning and related errors may also be caused by an unquoted attribute value containing one or more `"`. Example: `W3C`. In such cases, the solution is to put quotation marks around the value.

✖ Line 4, Column 92: character data is not allowed here

```
...iewport" content="width=device-width, initial-scale=1.0, maximum-scale=1.0;" />
```

You have used character data somewhere it is not permitted to appear. Mistakes that can cause this error include:

- putting text directly in the body of the document without wrapping it in a container element (such as a `<p>aragraph</p>`), or
- forgetting to quote an attribute value (where characters such as `"` and `'` are common, but cannot appear without surrounding quotes), or
- using XHTML-style self-closing tags (such as `<meta ... />`) in HTML 4.01 or earlier. To fix, remove the extra slash (`'`) character. For more information about the reasons for this, see [Empty elements in SGML, HTML, XML, and XHTML](#).

✖ Line 5, Column 86: end tag for element "LINK" which is not open

```
...rel="stylesheet" type="text/css" href="/ri/newUIGlobal_05-OCT-2013.css"></link>
```

The Validator found an end tag for the above element, but that element is not currently open. This is often caused by a leftover end tag from an element that was removed during editing, or by an implicitly closed element (if you have an error related to an element being used where it is not allowed, this is almost certainly the case). In the latter case this error will disappear as soon as you fix the original problem.

If this error occurred in a script section of your document, you should probably read this [FAQ entry](#).

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the [FAQ item on valid flash](#).

You have used the attribute named above in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "Strict" document type with a document that uses frames (e.g. you must use the "Transitional" document type to get the "target" attribute), or by using vendor proprietary extensions such as "marginheight" (this is usually fixed by using CSS to achieve the desired effect instead).

This error may also result if the element itself is not supported in the document type you are using, as an undefined element will have no supported attributes; in this case, see the element-undefined error message for further information.

How to fix: check the spelling and case of the element and attribute, (Remember XHTML is all

lower-case) and/or check that they are both allowed in the chosen document type, and/or use CSS instead of this attribute. If you received this error when using the <embed> element to incorporate flash media in a Web page, see the [FAQ item on valid flash](#).

-  d.2 Failure of Success Criterion 1.4.3, 1.4.6 and 1...

Users with vision loss or cognitive challenges often require specific foreground (text) and background color combinations. For instance, many people with low vision find it much easier to see a Web page that has white text on a black background, so they may have set their user agent to create this contrast. If the author specifies that the text must be black, then it may override the settings of the user agent and render a page that has black text (specified by the author) on black background (that was set in the user agent). This principle also works in reverse. If the Webmaster forces the background to be white, then the white background specified by the author

would be the same color as the white text (which was set in the user agent) rendering the page unusable to the user. Therefore, if the author specifies a foreground (text) color then they should also specify a background color which has sufficient contrast (link) with the foreground and vice versa.

Be sure that the law you read is the law indeed

Official isn't just a word. It's a process. The Mississippi Joint Legislative Committee on Compilation, Revision and Publication of Legislation maintains careful editorial control over the publication of the official code, from the moment LexisNexis receives the acts to the final galley proofs of the finished product. Their strict supervision ensures that the published code and its supplements contain no errors in content, conform carefully to the numbering scheme, and publish in a timely manner.

Cite the code that's guaranteed to be right

Because it's official, you can rely on LexisNexis' Mississippi Code of 1972 Annotated for the correct statement of the law, whether you get it on CD, in print, or online through LexisNexis at lexis.com. Cite it with confidence; it's the original source supported by the state and guaranteed to be the accepted authority in the state court system. Don't bet on derivative sources created outside and distant from the process.

Rely on over 150 years of code publishing experience

The lawyer-editors who prepare the Mississippi Code of 1972 Annotated work in close cooperation with the Legislative Committee to provide you with the most accurate, comprehensive, and current statutory language available. They read and analyze every Mississippi and federal case construing the statutes and court rules, as well as opinions of the Attorney General and other administrative and regulatory agencies. They then create concise annotations that interpret the statutes, giving you insight into how courts apply your case's facts. Their efforts save you valuable research time by focusing only on cases that are on point, current, and relevant.

JUDICIAL DECISIONS

1. In general.

Former statute making it an offense to keep, have in possession, sell or give away intoxicating liquor, and providing for gradation of punishment for repeating offenders, notwithstanding repeal under this section, must be considered by way of aid to a proper construction or interpretation of the revised abridgment which took its place. *Millwood v. State*, 190 Miss. 750, 1 So. 2d 582 (1941), *aff'd*, 6 So. 2d 619 (Miss. 1942).

Words omitted in the publication of the code, and which are contained in the copy on file in the office of the secretary of state, must control in the construction of the statute. *Nugent v. Mayor of Jackson*, 72 Miss. 1040, 18 So. 493 (1895).

A purely local act, devised to meet the needs of a single community, was not repealed by a similar provision (Code of 1892). *Jones v. Melchoir*, 71 Miss. 115, 13 So. 857 (1893); *Adams v. Dendy*, 82 Miss. 135, 33 So. 843 (1903).

1. In general.

Where statute, authorizing circuit judge to determine, in vacation, appeals from county court, was omitted, because considered unconstitutional, from Code taking effect subsequent to statute, though statute and Act adopting Code were approved by Governor on same day, statute held not in force after effective date of Code. *Rackley v.
