

Comment on the open distribution of Federal Guidelines.

There really is no reason to be collecting comments - the laws of this nation's government which is supposed to be for the people of this country **MUST** be open to inspection, review, and comment at all times or this government has violated its own governance laws and thereby holds no authority. Discussion of whether this information should be public or not is not open to debate - either it is openly published information or it holds no weight - in court or otherwise.

PUBLISH EVERYTHING.
