

To whom it may concern,

I'm a voting-age, tax paying citizen of the United States.

We cannot tell citizens to obey laws that are only available for the rich to read. The current incorporation by reference system acts as a poll tax on access to justice, a deliberate rationing and restriction of information critical to our public safety. That system is morally wrong and it is legally unconstitutional.

Please do the right thing. Make code documents open and available for free.

Thank you for your time,

Keith T. Allshouse
