COMMENT

All information that are part of the bod of laws of the USA need to be free and open to the citizenry of the USA. While others may bring up the monetary issues here, a greater fear for me is that this creates an accepted ex post facto exception. that cannot be allowed to continue. Open the laws to the citizenry, and open source the creation of standards so that the npo's that create these standards and incorporate them into laws can benefit of the monetary savings as well as the higher standard of product that open source makes.
