

In my opinion, laws or regulations which use "Incorporation by Reference" are anathema to a democratic civil society. It is said that "ignorance of the law is no excuse," but any law which must be paid for can be rightly ignored by any reasonable rule of law. Such hidden laws are a reasonable excuse for ignorance.

I strongly encourage either the direct incorporation of any applicable documents into the USC and CFR, or to have these documents be made freely and widely available by the US Government, so anyone subject to such may be fully informed without burden.
