### Comment

To Whom It May Concern:

Girard Equipment Inc., as a key stakeholder in the manufacturing of Re-Closing Pressure Relief Devices, fully supports the wording and intent of this Notice of Proposed Rulemaking. Currently, there is a lot of confusion with the wording and lack of wording in the regulations for transportation of Hazardous Materials. The technical support staff at Girard Equipment, on a daily basis, fields questions regarding the correct interpretation of the regulations. We feel that the current proposal in its entirety will clarify the requirements applicable to the testing of pressure relief devices for cargo tank motor vehicles in section 180.407.
