### Comment

Dear PHMSA Rule-making Division,  
I have reviewed the changes proposed in Docket No. PHMSA20130225 (HM218H) and specifically the bench testing rules in Part 180.407. I would like to express my support for the changes as proposed because the new wording clearly and correctly states the requirements for re-qualifying a pressure relief device. The current wording causes confusion and misinterpretations and the proposed change clarifies the requirements of bench testing and will promote consistent enforcement. The pressure relief device is a crucial component to a safe cargo tank and PHMSAs proposal to offer consistent and clear testing requirements for PRDs will promote safety in the industry.

Thank you,  
David Adams  
Manager of Design Engineering  
Betts Industries Inc.
