This is a Comment on the **Federal Highway Administration (FHWA)** Proposed Rule: **National Performance Management Measures: Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program**

For related information, [Open Docket Folder](#)

Comment

Pavement condition must include the condition of shoulders and bicycle lanes used by bicycles as it affects bicyclists using those facilities.

Pavement condition must include the condition of adjacent sidewalks, paths, and walkways used by pedestrians as it affects pedestrians using those facilities.

Poor pavement conditions lead to more crashes by bicyclists than vehicle interactions.

More pedestrians are injured by falls than by vehicles.
