Comment

I'm writing to appeal to the Access Board to reconsider the exclusion of provisions for low vision users in the Section 508 refresh. While those of us in the accessibility and usability community applaud the efforts of the Access Board to be more consistent with WCAG 2.0, we need to ensure that users with low vision are considered as much as they are in the current Section 508, specifically 1194.22(d), which mandates that documents be readable without associated style sheets. Please reconsider this decision. Best regards, Jayne Schurick Usability and Accessibility Specialist
