Comment

The U.S. Access Board,

I request you to please consider the following comment and suggestion for re-phrasing a particular rule:

503.2 User Preferences. Applications shall permit user preferences from platform settings for color, contrast, font type, font size, and focus cursor.

Comment: Confusing wording " ... user preferences from platform settings for ..."

Suggested re-wording:

503.2 User Preferences. Applications platform settings shall permit user preferences for color, contrast, font type, font size, and focus cursor to be set.

Or, "to be modified" ... in place of "to be set".

Thank you very much.
