Comment

To Whom It May Concern Please see below email traffic reference the low vision section of your proposed rule for information technology accessibility. Please consider including "control of color" under "control of contrast" (black background with white text, for example). "Low vision" is also a subjective term so some folks may be expecting to see information on Screen Readers, braille readers, etc. here. Reference - "302.2 With Limited Vision. Where a visual mode of operation is provided, ICT shall provide at least one mode of operation that magnifies, one mode that reduces the field of vision required, and one mode that allows user control of contrast." Thanks! The answer to "Who else needs to know?" is always "Villano! The KMO!" Paul PAUL VILLANO Knowledge Management Officer (KMO), GS-12 US Army Chaplain Center and School (USACHCS)
