Comment

This change is a necessity to a community that sometime is forgotten. Needless to say this regulation is long overdue.

I would hope that the communities where these conferences are taking place: San Diego; Washington DC; and Salt Lake City show some compassion and vote with their hearts and conscience.

Allowing these folks to have the opportunity to browse the internet will become a more of a requirement as we forge deeper into the future of the web. Everything will eventually be accessible from the internet.

Your efforts to have this revision/change brought to light is to be commended, thank you for your determination.
