### Comment

Please get the new 508 regulations out as soon as possible.

I work for a federal agency that is constantly introducing programs that are either not accessible or only partially accessible to me as a totally blind person. The programs that are provided to my sighted counterparts are programs that make their jobs faster to perform. And since it seems that the government now is all about speedtalking with the most people and handling the most claims in the shortest time possible and as expeditiously as possible I'm not able to compete. I simply do not have the tools to do as quickly what they do. This results in a lot of pressure on my part because I can't compete with them and I often feel like I am failing my clients.

Please ensure that the programs the government develops for the sighted are usable by the blind as well.

Thank you.

Ann Brash
