### Comment

Statoil requests that the comment period for the proposed rule (Blowout Preventer Systems and Well Control) be extended an additional 120 days beyond the present comment period ending June 16, 2015.

BSEE has worked tirelessly for the past several years to produce this new Rule.

Once finalized, the new Well Operations and Equipment Rule (30CFR250 - Subpart "G"), as stated in the Executive Summary in the NPRM, will impact all wellbore operations from spud to permanent abandonment.

By allowing the requested 120-day extension, both government's and industry's SME's will have sufficient time to finalize this all important Rule.
