Comment

The implications of these new rules are incredibly far reaching. Allowing only 60 days to review, digest, research solutions to even meet the new rules and comment back is inexcusable when the regulations took years to put on paper. Consider that the subject matter experts in subsea have day jobs that do not allow them to drop everything and look at these regulations. An extension on the comment period is warranted so that the fallout from these rules can be explained in a clear and concise way.

Regards,

Michael Guerin
