Mr. Cade,

Thank you so much for your interest in the project generally and this event specifically. We have changed the date a bit—now it will take place on the afternoon of May 1<sup>st</sup>. We're still lining up the speakers, and are trying to provide one slot to each of the various perspectives on the issues, which allows one slot for a representative of standard developers. Scott Cooper has agreed to fill this slot, and I think he will be able to represent both ANSI and the standard development community well.

I hope you and any of your other interested colleagues will attend the event and participate in the question and answer session. We'll also have further opportunities for engagement following the event. For example, we are contemplating holding an online forum to continue the discussion.

I'll keep you updated as we firm up the plans for the event. Thanks again for your kind offer of assistance.

All the best,  
Emily

How will the various participants be selected for the various disciplines? NFPA would be happy to provide someone. Thanks!
