# ***California Fire Code Preface***

This document is Part 9 of the official 2001 triennial compilation and publication of the adoptions, amendments and repeal of building regulations to the California Code of Regulations, Title 24, also referred to as the *California Building Standards Code*. This Part is known as the *California Fire Code* and incorporates by adoption the 2000 edition of the Uniform Fire Code of the Western Fire Chiefs Association with necessary California amendments.

The *California Building Standards Code* is published in its entirety every three years by order of the California legislature, with supplements published in intervening years. The California legislature delegated authority to various State agencies, boards, commissions and departments to create building regulations to implement the State's statutes. These building standards have the same force of law, and take effect 180 days after their publication unless otherwise stipulated. *The California Building Standards Code* applies to all occupancies throughout the State of California as annotated.

A city, county or city and county may establish more restrictive building standards reasonably necessary because of local climatic, geological or topographical conditions. Findings of the local condition(s) and the adopted local building standard(s) must be filed with the California Building Standards Commission to become effective and may not be effective sooner than the effective date of this edition of *California Building Standards Code*. Local building standards adopted to be applicable to previous editions of the *California Building Standards Code* do not apply to this edition without appropriate adoption and the required filing.

To familiarize yourself with the format of this code, it is suggested that users review the following Pages:

- How to Distinguish Model Code Language From California Amendments
- Matrix Adoption tables

Should you have any questions regarding this code or wish to offer comments toward improving the format, please address your questions and comments to:

***How to Distinguish  
Model Code Language  
From  
California Amendments***

To distinguish between model code language and the incorporated California Amendments, including exclusive California standards – California amendments will appear in italics.

Symbols in the margins indicate the status of code changes as follows:

*[“XX”]* This symbol identifies which State agency(s) by its “acronym” that has amended a section of the model code. For a complete listing of the State agency acronyms, see the Application Section within Chapter 1.

CA

CA This symbol indicates a California Amendment has been made to the model code.

CA

||

This symbol indicates that a change has been made to a California Amendment.

This symbol indicates that model code language has been deleted within the

California amendment

L This symbol is primarily for the benefit of local agencies, such as city and county building departments, who, by law, must enforce selected sections of the California Building Code. An “L” next to the “CA” signals such sections in the outside margin.

> This symbol indicates deletion of California language
