Remit completed form to:

Procurement Division

One-Time Acquisitions

707 Third Street, 2nd Floor

West Sacramento, CA 95605

10/26/10

Complete responses must be provided for all of the following items.

A. THE GOOD/SERVICE REQUESTED IS RESTRICTED TO ONE SUPPLIER FOR THE REASONS STATED BELOW:

1. Why is the acquisition restricted to this good/service/supplier?

(Explain why the acquisition cannot be competitively bid. Explain if this is an emergency purchase or how the supplier is the only source for the acquisition and reference the PCC that applies, i.e., 12102, 10301/10302, or 10340.

The California Electrical Code is based on a model building code, the National Electrical Code (NEC). The California Electrical Code includes both provisions of the NEC and amendments to the NEC adopted by California.

NFPA owns the copyright to the NEC; therefore, NFPA must be the publisher of the California Electrical Code if it is going to contain both NEC provisions and California's amendments to the NEC. If NFPA is not the publisher, California's amendments to the NEC could not be published with the provisions of the NEC adopted by California.

2. Provide the background of events leading to this acquisition.

Throughout most of the 1980s, California published only the amendments it made to model building codes, using the Office of State publishing as the publisher. The building industry did not like having to refer back-and-forth between model code books and books containing California's amendments to model codes. Therefore, in 1989, publication agreements were entered into, pursuant to Health and Safety Code Section 18928.1, so that California's amendments could be published with the model codes they amended.

3. Describe the uniqueness of the acquisition (why was the good/service/supplier chosen?)

NFPA owns the copyright to the model building code upon which the California Electrical Code is based. Therefore, NEC must be the publisher of the California Electrical Code if it is going to contain both NEC provisions and California's amendments to the NEC.

4. What are the consequences of not purchasing the good/service or contracting with the proposed supplier?

If the commission does not contract with NFPA to publish the California Electrical Code, it will not be able to have the NEC provisions adopted by California published with California's amendments to the NEC. The publishing situation will return to that which existed in the 1980s where California's amendments to model codes were not published with the model codes they amended. This was something the building industry found problematic.

5. What market research was conducted to substantiate no competition, including evaluation of other items considered?

(Provide a narrative of your efforts to identify other similar or appropriate goods/services, including a summary of how the department concluded that such alternatives are either inappropriate or unavailable. The names and addresses of suppliers contacted and the reasons for not considering them must be included <u>OR</u> an explanation of why the survey or effort to identify other goods/services was not performed.)

NFPA owns the copyright to the NEC, which is the model building code upon which the California Electrical Code is based. Therefore, NFPA must be the publisher of the California Electrical Code if it is going to contain both NEC provisions and California's amendments to the NEC. If the commission does not contract with NFPA, it will not be able to have the NEC provisions adopted by California published with California's amendments to the NEC. The building industry found the latter to be unworkable.

B. PRICE ANALYSIS

1. How was the price offered determined to be fair and reasonable? (Explain what the basis was for comparison and include cost analyses as applicable.)

There is no cost involved in this contract. The publisher recoups its publication costs in sales of the codes.

2. Describe any cost savings realized or costs avoided by acquiring the goods/services from this supplier

There is no cost involved in this contract. The publisher recoups its publication costs in sales of the codes.

BUILDING STANDARDS COMMISSION

2525 Natomas Park Drive, Suite 130 Sacramento, CA 95833-2936 (916) 263-0916 FAX (916) 263-0959

MEMORANDUM

DATE:

October 20, 2010

TO:

DGS – Procurement

FROM:

Katrina Benny

SUBJECT: Certification Requirement – NCB, NFPA

I certify that this purchase is vital and mission critical for the Building Standards Commission.

The California Electrical Code is based on a model building code, the National Electrical Code (NEC). The California Electrical Code includes both provisions of the NEC and amendments to the NEC adopted by California.

NFPA owns the copyright to the NEC; therefore, NFPA must be the publisher of the California Electrical Code if it is going to contain both NEC provisions and California's amendments to the NEC. If NFPA is not the publisher, California's amendments to the NEC could not be published with the provisions of the NEC adopted by California.

10/20/10

Katrina Benny

CBSC Administrative Manager
