ASHRAE cannot advocate the adoption or use of Standard 189.1 in the United States independent of the IGCC. If we know someone is proposing to reference just 189.1, we are obligated to propose a reference to the IGCC which contains the 189.1 compliance option.

That being said, we can't force a jurisdiction to choose what to reference. If we ask them to reference the IGCC, and they say no, then that's the only way just the adoption of 189.1 can occur.

- Is there a case to be made, and a strategy to pursue, for adoption of Standard 189.1 independent of the IgCC? **No, essentially 189.1 must be marketed to jurisdictions as a compliance path of the IgCC.**

I copied Steve – He may have something to add.

Subject: SSPC 189.1 notes on adoption from excom conference call

Here are my notes from last week's discussion of adoption (or lack thereof) of 189.1. Let me know if you have any questions or comments. I will start pursuing the actions in my spare time.
