Dennis,

It's up to you, but I would let the committee know. But let them know that it also allows the building to meet the IgCC or be LEED silver or above (any of the three).

Martha

Interesting, and news to me. They deleted Std 62.1 and Std 90.1 from referenced codes and added Std 189.1. That seems to make the "high performance" code also the "minimum" code.

I wonder if I should send to full committee. Thoughts, anyone?
