Rhonda and Robert,

Since the HUD committee is meeting in the next couple of weeks I thought it would be better to send an electronic copy of the standard, to make sure it arrives in time. Attached is a PDF copy of ANSI/ASHRAE Standard 62.2-2007 for HUD use only. This is a copyrighted document. Please do not distribute it outside of the HUD Manufactured Housing Consensus Committee (MHCC) task force on Indoor Air Quality. Also, please do not reprint without ASHRAE permission.

Thanks,
Mark

Rhonda,

Below is an e-mail from Steve Emmerich, who is chair of ASHRAE Standard 62.2. He has talked to Mark Webber at ASHRAE about getting copies of 62.2 sent to members of the HUD Manufactured Housing Consensus Committee (MHCC) task force on Indoor Air Quality. Mark needs to know where to mail them. Can you please get back to Steve & Mark with this information ASAP? I have CCEd both this e-mail.

Thanks for your assistance.

Best Regards,
Mike Lubliner

Mike,

Sounds like ASHRAE will help - who's the official contact with whom Mark should communicate? You?

steve

Mark,

Any chance of ASHRAE sending comp copies of 62.2 to the HUD manufactured housing committee folks as they consider adopting 62.2?

thanks
steve

Steve,

I talked with HUD today about setting up a 2 hour conference call with MHCC 8 members of my IAQ task force sometime in the next couple of weeks. As you are aware the MHCC received 2 proposals (one from me the other from Dave Jacobs) to have MHCSS adopt 62.2 in whole.

I would really like to have you (to provide overview), Don Stevens (address first cost issues) and Dr. Jabobs all on the call. If we exceed the number of folks we can have on the HUD conf line, I have offered the up the the WSU conference line. How does your schedules look for the next few weeks say mon-thu 11-1:00PM EST?

Also, I'd like to provide each task group member with a copy of 62.2 to review prior to the meeting. Amazing but true, HUD has no funds to pay the these copies, so I wonder I you can request ASHRAE provide 8 complementary copies? I would make the case that if HUD adopts 62.2 ASHRAE will sell at least a hundred of them to industry stakeholders.

I was also thinking that there may be some NIST and ASHRAE research papers that we could share with the IAQ task group that relate to ventilation in HUD-code homes. In know Don Steven and I did NIST has a report on the MH lab, that may help make the case? That may be overload of too much techy stuff?

Can you call or e-mail me to discuss ASAP? Cell is 360-951-1569

Best Regards,
Mike Lubliner
