

## LexisNexis® CD on Folio® 4 Software Release 2.0

### RELEASE NOTES

This *LexisNexis*® CD on Folio® 4 software release (version 2.0) features several product enhancements, key among them being the following:

- Support for the Microsoft Windows Vista™ operating system.\*
- Significantly improved accessibility for visually impaired users,† including an upgrade to Folio version 4.7.
- Retention of document formatting when copying and pasting text from a publication into a supported word-processing environment.
- Improved default user interface.
- An automatic, behind the scenes utility for identifying and resolving user-specific interface and/or software problems.
- The option to implement a user login feature and/or product-usage tracking.

**IMPORTANT!** For those users installing over **version 1.0.3** of the *LexisNexis CD on Folio 4* application, it **will** be necessary to re-run client setup for version 2.0. This can be done either at the individual work stations or via a network push. In the former case, upon first attempting to access the *LexisNexis CD on Folio 4* application subsequent to running the Administrator setup, client users will receive a message alerting them to the need to re-run client setup. If they respond **Yes** to re-run setup, the message will close, setup will automatically launch, and installation will proceed as outlined in the Quick Installation Guide document accompanying the product. If users respond **No** to the message alerting them to re-run setup, the message will close and they will be unable to access the application. To instead re-run client setup via network push, follow the instructions outlined under section VIII of the Readme file (found at D:\Readme.txt).

### User Documentation

The *LexisNexis CD on Folio 4* application comes complete with a comprehensive set of user documentation designed to help familiarize you

\* As previously communicated and in keeping pace with technology as well as Microsoft® policies related to the support of older operating systems, version 2.0 of the *LexisNexis CD on Folio 4* program does not support Windows® 98, Windows® 98SE, Windows® ME, or Windows NT®4.

† While version 2.0 of the *LexisNexis CD on Folio 4* program is not 100% accessible according to the FRA section 508 guidelines, the implemented enhancements have significantly improved accessibility for users of screen-reader software.
