

**Errata for the
2000 Uniform Plumbing Code™**
(2nd Printing -Text Book)

After the printing of the 2000 Uniform Plumbing Code we found several items that need altering:

- *Table 6-4 : Under **Notes:** add footnote 3 to read : The listed fixture unit values represent their load on their cold water service. The separate cold water and hot water fixture unit value for fixtures having both hot and water connections may each be taken as three-quarter (3/4) of the listed total value of the fixture. – Renumber remainder of footnotes below and as well as footnotes referenced in table above.*
- *Page 5, Section 103.4.5.3
The referenced section should read: The Administration Authority may authorize refunding of not more than a percentage, as determined by this jurisdiction, when an applicant for a permit for which a plan review fee has been paid is withdrawn or cancelled before any plan review effort has been expended.
The rest of this section remains unchanged.*

Please see attached page(s) with corrections and insert update(s) into your code book.

Thank you for purchasing the 2000 Uniform Plumbing Code.
We apologize for any inconvenience.
